ELIMINATE GREASY OVEN BUILD-UP

Cleaning System for Combi Ovens

- Oven cleaner and oven rinse for use in Combi Ovens.
- Cuts tough baked on grease.
- Provides a rinse step to complete the cleaning process.
- Combi Ovens dispense both solutions.
- No Personal Protective Equipment required with use solutions.

Breaks up grease and lifts up soil from surfaces of Combi Ovens.

DIRECTIONS FOR USE:

Directions, including pictures, are available on the Ecolab Sales Support Site.

1. **Remove Previous Product if Applicable**
2. **Set Up Probes**

   Use the two probes attached to the Combi oven and attach the probe caps from the install kit. Use two plastic tie clamps to secure the cap so the probes are consistently on the bottom of the bottles.
3. **Specialty Oven Cleaner**

   Place the probe into the Specialty Oven Cleaner (6100704) which is ready-to-use and tighten the cap securely. Place on the shelf under the oven. Put Specialty Over Cleaner label around the tube.
4. **Specialty Oven Rinse**

   Place the probe into the Specialty Oven Rinse (6100705) which is ready-to-use and tighten the cap securely. Place on the shelf under the oven. Put Specialty Oven Rinse label around the tube.
5. **Fill Spray Bottles**

   Fill spray bottles with solution and apply the spray bottle labels.
6. **Training**

   Show the General Manager how both products are connected to ovens. Also, show them where the Specialty Oven Cleaner and Rinse is kept (in storage area) so they can replace them as needed. Let them know they need to monitor the product levels so they do not run out.
